

1. Build fails: `NoSuchElementException` on `id/get_started`

2. LARA-D: `run_pytest` → parse error → wrong id extracted

3. LARA-D: `collect_ui_hierarchy` (pm clear + monkey + dump) → correct id = `intro_start`

4. LARA-D: `finish` → emit *SymptomReport*

5. LARA-R: `analyze_report` → plan: replace `get_started` → `intro_start`

6. LARA-R: `apply_patch` (Claude CLI) → GVPV check → VERIFIED

7. LARA-R: `run_pytest` → PASS

8. Orchestrator: success. Elapsed: 205 s
